

Journal of Computers

ISSN 1796-203X

Volume 5, Number 2, February 2010

Contents

Special Issue: Recent Trends and Advances in Computer Science-Technology and Applications

Guest Editors: Qihai Zhou and Peng Wang

Guest Editorial 167
Qihai Zhou and Peng Wang

SPECIAL ISSUE PAPERS

Isomorphic New Parallel Division Methods and Parallel Algorithms for Giant Matrix Transpose 169
Qi-hai Zhou and Yan Li

Algorithm Dynamics Analysis Method 178
Peng Wang

Adaptive Requirement-Driven Architecture for Integrated Healthcare Systems 186
Hongqiao Yang, Kecheng Liu, and Weizi Li

A 105 dB DR, -101 dB THD+N Sigma-Delta Audio D/A Converter with A Noise-shaping Dynamic Element Matching Technique 194
Hui Feng and Zeqi Yu

Adaptive Extraction of Principal Colors Using an Improved Self-Growing Network 202
Yurong Li, Zhengdong Du, and Hongguang Fu

Study on Optimization Technology in Computing Ordinal Number 210
Jun Lu, Tong Wang, and Yibing Li

Research on the Reconfiguration Router Unit Component Composition Technology Based on the Agent 218
Qiang Liu, Binqiang Wang, Wanwei Huang, and Nan Jiang

A Novel Numerical Computation Method Based on Particle Swarm Optimization Algorithm 226
Yongquan Zhou and Xingqiong Wei

Nonlinear Combinational Forecasting Based on Support Vector Machine 234
Wenqing Zhao and Bo Jiang

Optimizing the Management of Reference Prediction Table for Prefetching and Prepromotion 242
Junjie Wu and Xuejun Yang

The Future-Oriented Middleware Technology 250
Qilin Li and Mingtian Zhou

Breeding Software Test Data with Genetic-Particle Swarm Mixed Algorithm 258
Kewen Li, Zilu Zhang, and Jisong Kou

A Semiotic Multi-Agent Modeling Approach for Clinical Pathway Management <i>Weizi Li, Kecheng Liu, Shuzhang Li, and Hongqiao Yang</i>	266
Study on Early Warning of Competitive Technical Intelligence Based on the Patent Map <i>Xianjin Zha and Minghong Chen</i>	274
Edges Extraction Method based on Fractal and Wavelet <i>Qingsheng Zhu, Yanxia Wang, and Huijun Liu</i>	282
The Research of Fuzzy Segment Query under the Spatial Database <i>Guangjun Song, Zhongxiao Hao, and Chunjuan Wang</i>	290
Game-based Data-Forward Decision Mechanism for Opportunistic Network <i>Cheng Zhang, Qing-sheng Zhu, and Zi-yu Chen</i>	298
Anomaly Detection Based on a Multi-class CUSUM Algorithm for WSN <i>Zhengong Xiao, Zhigang Chen, and Xiaoheng Deng</i>	306
Ontology-based Enterprise Content Retrieval Method <i>Huiying Guo and Jinghua Zhao</i>	314
Analysis of Valid Closure Property of Formal Language <i>Wenyu Chen, Xiaobin Wang, Xiaoou Cheng, and Shixin Sun</i>	322
