Journal of Computers

ISSN 1796-203X

Volume 8, Number 4, April 2013

Contents

REGULAR PAPERS

Controllable Ring Signatures and Its Application to E-Prosecution 833
Wei Gao, Guilin Wang, Xueli Wang, and Dongqing Xie

Deadline Guarantee Enhanced Scheduling of Scientific Workflow Applications in Grid 842
Chaokun Yan, Huimin Luo, Zhigang Hu, Xi Li, and Yanping Zhang

Solving the Employee Timetabling Problem Using Advanced SAT & ILP Techniques 851
Fadi A. Aloul, Syed Z. H. Zahidi, Anas Al-Farra, Basel Al-Roh, and Bashar Al-Rawi

Mapping Floating-Point Kernels onto High Performance Reconfigurable Computers 859
Gerald R. Morris and Khalid H. Abed

A Fusion of Real and Virtual Information for Aiding Aircraft Pilotage in Low Visibility 874
Peng Cheng, Xiaofeng Li, Yuezhou Wu, and Shicai Feng

Combining Domain-Specific Sentiment Lexicon with Hownet for Chinese Sentiment Analysis 878
Lizhen Liu, Mengyun Lei, and Hanshi Wang

Efficiency Optimization of Asynchronism Motor Based on a Novel Reaching Law 884
Jing-li Miao and Yuan Huang

Effective Improvement for Depth Estimated Based on Defocus Images 888
Hao Wang, Fengyun Cao, Shuai Fang, Yang Cao, and Chunlong Fang

Research on Real-time Simulation and Control of Linear 1-stage Inverted Pendulum 896
Zheying Song, Xueling Song, Chaoying Liu, and Yingbao Zhao

Effective Single Underwater Image Enhancement by Fusion 904
Shuai Fang, Rong Deng, Yang Cao, and Chunlong Fang

Intervention Learning of Local Causal Structure Based on Sensitivity Analysis 912
Junzhao Li, Hongliang Yao, Jian Chang, Shuai Fang, and Jianguo Jiang

Quick Attribute Reduction Based on Approximation Dependency Degree 920
Min Li, ShaoBo Deng, Shengzhong Feng, and Jianping Fan

A Task Scheduling Algorithm for Hadoop Platform 929
Jilan Chen, Dan Wang, and Wenbing Zhao

Study and Improvement on Particle Swarm Algorithm 937
Hui Xu, Yongguo Yang, and Lei Mao

A Novel Context-aware Modeling and Reasoning Method based on OWL 943
Bo Hu, Zhi-Xue Wang, and Qing-Chao Dong

A Greedy Correlation Measure Based Attribute Clustering Algorithm for Gene Selection 951
Jiucheng Xu, Yunpeng Gao, Shuangqun Li, Lin Sun, Tianhe Xu, and Jinyu Ren

Study on Soft Groups 960
Xia Yin and Zuhua Liao

A Quality of Service Anycast Routing Algorithm Based on Improved Ant Colony Optimization 968
Yongsheng Li

Diagnosis Model Based on Least Squares Support Vector Machine Optimized by Multi-swarm Cooperative Chaos Particle Swarm Optimization and Its Application 975
Guojun Ding, Lide Wang, Peng Yang, Ping Shen, and Shuping Dang

The Technique of Gas Disaster Information Feature Extraction based on Rough Set Theory 983
Hui Li, Shu Zhang, and Xia Wang

A Parallel Attribute Reduction Algorithm based on Affinity Propagation Clustering 990
Hong Zhu, Shifei Ding, Xinzheng Xu, and Li Xu

Principles and Model for Web Dataspace 998
Zhengtao Liu and Jiandong Wang

Research on Economic Grid Resource Scheduling for Utility Optimization 1006
Juan Chen

A Multi-granular Fuzzy Comprenhensive Evaluation Model for E-commerce Enterprise Image 1011
Wei Qi and Juan Chen

Research on CRFs in Music Chord Recognition Algorithm 1016
Feng Wang and Xueying Zhang

Position Location and Trajectory Tracking for MUWT Based Kinematics Approach 1020
Kun Yu, Guohua Xu, and Xiong Shen

Mathematical Model and Computer Simulation for Oil Spill in Ice Waters Around Island Based on FLUENT 1027
Wei Li, Xiao Liang, and Jianguo Lin

Multi-Agents Computational Experiment on Twice-Linked Model of Unconventional Emergencies Evolution Mechanism 1035
Qing Yang, Fan Yang, and Yanling Yu

A Fuzzy Comprehensive Assessment System of Dam Failure Risk Based on Cloud Model 1043
Ying Jiang and QiuWen Zhang

Target Detection and Pedestrian Recognition in Infrared Images 1050
Jiabao Wang, Yafei Zhang, Jianjiang Lu, and Yang Li

Dynamic Modeling and Computer Simulation for Autonomous Underwater Vehicles with Fins 1058
Xiao Liang, Jundong Zhang, Yu Qin, and Hongrui Yang

Real-time Detection Technology Based on Dynamic Line-edge for Conveyor Belt Longitudinal Tear 1065
Tiezhu Qiao, Yantong Tang, and Fuchang Ma

Using Markov Process for Passenger Structure Prediction within Comprehensive Transportation Channel 1072
Dong Wang, Xiaonian Sun, and Yanhong Li

DOA Estimation Method Based on Differential Covariance Matrix 1078
Jie Zhou, Guangjun Li, and Zhi Zheng

Red Blood Cell Surface Segmentation Based on Shape Reconstruction and Statistics Feature Extraction 1083
Ruihu Wang

A Classification Algorithm for Network Traffic based on Improved Support Vector Machine 1090
Lei Ding, Fei Yu, Sheng Peng, and Chen Xu
